
*University of Mary's RRT to BSRT
Online Completion Program*

Program Outcomes

- Provide a well-rounded and formative online education for the respiratory care practitioner seeking academic and professional advancement.

Upon graduation, students will be able to:

Students will articulate professional and clinical roles related to the respiratory therapy profession such as leadership, education, and research.

- Foster problem solving and critical thinking skills as consultants to physicians and other healthcare personnel in developing patient care strategies.

Upon graduation, students will be able to:

Students will use critical thinking skills and work collaboratively to develop protocols to address challenges in clinical care.

- Enhance student proficiency in the critique and interpretation of scientific literature by demonstration of effective oral and written communication.

Upon graduation, students will be able to:

Students will develop an evidenced-based research paper that will demonstrate their ability to formulate a clinical question, search the literature, appraise, and apply to clinical practice.

- Enhance or provide new knowledge on the ethical obligations and leadership responsibilities of healthcare professionals through the development of honest, competent, and forward-looking clinicians.

Upon graduation, students will be able to:

Students will be able to apply ethical reasoning and critical thinking to solve clinical problems to develop leadership principles.

- Communicate the importance of effective cross-cultural and interdisciplinary human interaction skills in the healthcare setting and the broader community.

Upon graduation, students will be able to:

Students will develop a health promotion project and work collaboratively to communicate effectively as a member of an inter-professional team.
